

JOSE FRANCISCO JARQUIN MARTÍNEZ

| **Android Developer** | **Mobile Software Engineer** | **Technical Team Lead**

(+52) 951 123 2164 • JFJarquinM@gmail.com • [LinkedIn](#) • [Portfolio](#) • Oaxaca, México

PROFESSIONAL SUMMARY

Adaptable, impact-driven Android Developer with **5+ years** of experience building scalable mobile apps across fast-paced industries including telecommunications, food tech, agri-supply chain innovation and streaming service. Eager to support engineering teams in delivering seamless mobile experiences by combining clean architecture, thoughtful UI design, and fast-turnaround development. Successfully spearheaded the delivery of stalled features, resolved system-critical bugs across Android versions 8–15, mentored backend teammates, and built a traceability system that helped customs authorities prevent the distribution of contaminated produce.

WORK EXPERIENCE

ANDROID DEVELOPER | Neoris – Claro Video, Oaxaca, México

Feb 2026 – May 2026

- Optimized Android TV user interfaces based on UX/UI requirements, improving usability and visual consistency across streaming applications.
- Implemented Picture-in-Picture (PiP) mode for Android TV streaming applications serving users across Mexico and South America, leveraging AI-assisted development tools to accelerate delivery.
- Analyzed, identified, and resolved application defects reported through Jira, contributing to improved application stability and user experience.
- Managed user session and profile data to integrate securely with backend RESTful APIs.
- Monitored and analyzed mobile application network traffic, redesigning REST API requests and responses to improve testing efficiency and application performance.
- Performed UI reviews and implemented responsive design adjustments for high-traffic events, including FIFA World Cup-related releases, ensuring compliance with design specifications.
- Developed new features and user interfaces for Android TV streaming applications and set-top boxes.
- Implemented subscription and plan management features through WebView integrations within Android applications.

TECH LEAD | Neoris–Telcel, Oaxaca, México

May 2024 – Feb 2026

- Appointed Tech Lead for a mobile application used across **7,000+** devices in customer service and sales centers nationwide, improving the customer experience during smartphone sales.
- Took over after a **leadership gap** and successfully led the rollout of a stalled feature, coordinating closely with the external software factory to meet tight delivery timelines.
- Facilitated critical sessions between users, system owners, and backend teams, unlocking progress and unblocking dependencies during high-priority development cycles.
- Diagnosed and resolved a legacy system saturation issue that caused recurring failures, significantly boosting platform reliability across all touchpoints.
- Orchestrated direct user engagement through Teams and WhatsApp groups, gathering insights to inform testing, performance dashboards, and ongoing improvements.

ANDROID DEVELOPER | Neoris–Telcel, Oaxaca, México

Apr 2022–May 2024

- Delivered new features and resolved critical bugs under tight deadlines, supporting seamless customer interactions during high-volume mobile sales cycles.
- Resolved complex permission and internal storage issues across Android versions **8 through 15**, enhancing cross-device stability and reducing error reports.
- Designed and implemented **8 new** UI components with modern animations and transitions, improving user engagement and interface consistency.
- Shipped high-priority features in as little as **1 week**, helping accelerate release timelines and maintain operational agility.
- Collaborated closely with a **5-member** cross-functional team (backend and QA), streamlining testing and ensuring smooth feature rollouts.

ANDROID DEVELOPER | Check-Eat, Remote Contract Role

Feb 2022 – Apr 2022

- Contributed to a productivity and delivery platform targeting restaurants in Puebla, supporting operations in a region serving over **7 million** users.
- Fixed navigation map issues that were disrupting in-app user flow, enhancing accuracy and experience during live orders.
- Redesigned the restaurant presentation UI with smooth transitions and animations, improving visual clarity and responsiveness.
- Integrated quickly into a fast-paced team environment, delivering UI and system improvements within weeks of onboarding.

SOFTWARE ENGINEER | Universidad Panamericana, Campus Guadalajara

Jul 2020 – Dec 2021

- Developed a food traceability application that mapped the journey of avocados from harvest to supermarket using Google Maps, enabling visibility into the agricultural supply chain.

- Designed as part of a thesis project to support food safety protocols; allowed customs authorities to trace contaminated shipments back to their source and halt further distribution.
- Created documentation and video walkthroughs to ensure research continuity and facilitate knowledge transfer for future implementation.
- Built the app to support potential deployment by local avocado growers, with workflows adaptable to existing supply chain checkpoints.

CORE COMPETENCIES

- **Languages & Frameworks:** Kotlin, Java, Jetpack Compose, Firebase
- **Mobile Development:** Android SDK, Activity & Fragment Lifecycle, Dialog Fragments, Permissions Management, Local File Handling, UI Animations & Transitions
- **Architecture & Design Patterns:** MVVM, MVP, Clean Architecture, Dependency Injection
- **UI/UX Design:** Wireframing & Mockups, Modern UI Implementation, Responsive Design
- **API & Third-Party Integrations:** RESTful APIs, Facebook SDK, Google Maps SDK, External Libraries Onboarding
- **Testing & Quality Assurance:** Unit Testing, Code Refactoring, Performance Debugging
- **Version Control & Collaboration:** Git, GitHub, CI/CD Basics, Cross-functional Collaboration (QA & Backend)

EDUCATION AND CERTIFICATION

- | | |
|---|------|
| • Jetpack Compose: Curso definitivo desde - Udemy | 2025 |
| • Git + GitHub Desde Cero para Inicianes - Udemy | 2022 |
| • Ingeniero Informático. Computer Engineer - Instituto Tecnológico del Valle de Oaxaca, Oaxaca, México | 2021 |
| • Master Desarrollo Android con Java y Kotlin - Udemy | 2021 |
| • Android y Kotlin Desde Cero a Profesional Completo +45 horas - Udemy | 2021 |
| • Concientización General en Seguridad de Información v5.0 – Neoris Global Campus | 2026 |
| • Pruebas unitarias sobre entorno JAVA – Neoris Global Campus | 2026 |
| • Sistema de Gestión de Seguridad y Privacidad de la Información (SGSPI) V2.0 – Neoris Global Campus | 2026 |
| • “CODEMIE” – Eпам Neoris | 2025 |
| • Payment Card Industry Data Security Standard (PCI DSS) 4 – Neoris Global Campus | 2025 |
| • Continuidad de Negocio V1.0 – Neoris Global Campus | 2024 |
| • Sistema de Gestión de Seguridad y Privacidad de la Información (SGSPI) V1.0 – Neoris Global Campus | 2024 |
| • GDPR: Reglamento General de Protección de Datos – Neoris Global Campus | 2023 |
| • Gestión del tiempo – Neoris Global Campus | 2023 |
| • Metodología de Desarrollo de Proyectos de Software – Neoris Global Campus | 2023 |
| • OWASP Top 10 (2021) – Neoris Global Campus | 2023 |
| • Privacidad de Datos Personales v 2.0 – Neoris Global Campus | 2023 |
| • Proceso de Desarrollo Seguro NEORIS SSDLC – Neoris Global Campus | 2023 |
| • Secure Coding Practices – Neoris Global Campus | 2023 |
| • Análisis Dinámico (revisión de código dinámico) – Neoris Global Campus | 2023 |
| • Git + GitHub Desde Cero para Inicianes - Udemy | 2022 |
| • Diseño de Interfaces con Figma – Neoris Global Campus | 2022 |
| • Ingeniero Informático. - Instituto Tecnológico del Valle de Oaxaca, Oaxaca, México | 2021 |
